

Amended Paint Guidelines

April 9, 2021

The attached *McCormick Colonial Exterior Colors* chart will be used for the updated *Wooded Glen II HOA Architectural Committee Guidelines Exterior Painting* approval process.

Homeowner's must align with these colors, in addition to the builders original colors, for all exterior painting that includes **trim** (around/outside the front door, bay window, backdoor bump out, and eaves) and **accent trim** (front door, shutters, hand rail, and garage door).

The "Update" to the original *WG II HOA AC Guidelines* dated 1990 (pg. 8, #21) begins April 9, 2021 and applies to *exterior painting* home improvement projects in our community.

Any paint brand is allowed, as long as the homeowner can map their chosen brand and color to a color on the *McCormick Colonial Exterior Colors* chart (please see attached). Mapping is presenting the actual color chip/sample(s) of the desired brand and color and aligning it with the specific *McCormick Colonial Exterior* color(s). This can be accomplished through internet searches. (please see instructions below). This mapping and rationale must be included in the *Wooden Glen II HOA Architectural Modification Form* submitted by the Homeowner.

Limitations/Exclusions to the paint approval process include:

1. Choosing and using white and off white colors (Amber White #101, Colonial White #118, Super White #100, Sugarloaf #440) **ONLY** on the **trim** (around/outside the front door, bay window, back door bump out, and eaves);
2. Using no more than *two colors total* on the **accent trim** (door, shutters, hand rail, and garage door);
3. Using no more than *three colors total* on the exterior surfaces. Additionally, color combinations will need approval.

Mapping paint brand other than McCormick:

After choosing your paint brand and color, use Google search to enter brand name and paint color.

Example: enter *Behr Exterior Smoky White*; find/see *Images for behr exterior smoky white*; right click on image (below); copy; save to computer; resize appropriately; attach to AC Modification Form (along with the appropriate detailed information); submit for approval.
